

White Colour Control Ribbon

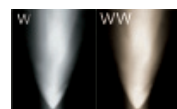

The White Colour Control LED Ribbon is a revolutionary LED strip light which incorporates both Warm White and Cool White SMD LEDs within the one strip.

This allows the user to select any white colour temperature ranging from 2800K through to 6000K, alleviating any discrepancies or opinionated issues that otherwise might occur with single coloured white strips.

With a simple press of a button you can change the visual appearance of products, objects, places or spaces.

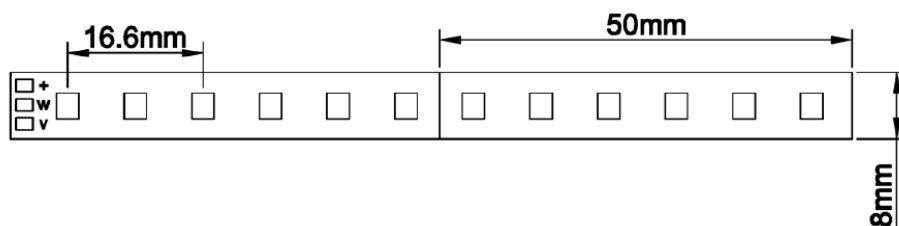

Keeping in tradition with other LED ribbon strip light products, the White Colour Control LED Ribbon is supplied with 3M self adhesive backing tape which can be mounted directly to most surfaces. It can also be mounted within all of our LED linear mounting profile products.

Available Colours

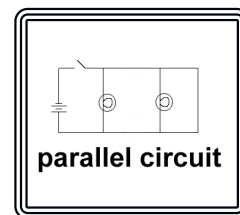

Technical Specifications (per metre)

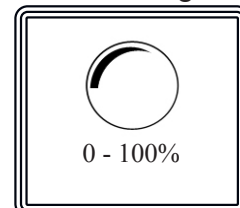

Product Description	White Colour Control Ribbon
Height	3mm
Width	8mm
LED Quantity	120 x SMD LED's
LED Spacing	16.6mm
Cutting Interval	50mm
IP Rating	No IP
Supply Voltage	12VDC
Power Consumption	4.8W per colour (9.6W total maximum)
Beam Angle	120°
Connection Type	Parallel
Roll Length	5m
White Colour Range	2800k - 6000k
LED LifeSpan	80,000 hours at 70% performance
Dimmable	Yes

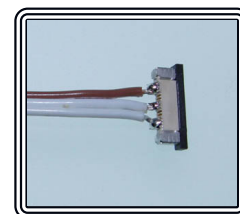

Wiring Type

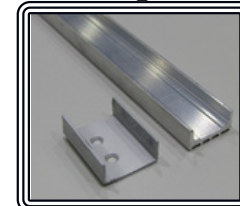

Dimming

End Connector

Mounting Profile

- IP Rating: No IP
- Input: 12V
- Power: 9.6W
- Beam: 120°
- Length: Max 5m
